Location:
Near to ORR
Exit No:4, Wadakpally,

Office Address:
Flat No 472, 3rd Floor, Sai Galleria,
Rd Number 36, Jubilee Hills,
Hyderabad, Telangana 500033.

Time Spent with family is
worth every second

CANAL SIDE PARK

Explore a natural side of the city at the

The park is a recent creation and is on reclaimed industrial land running along the Leeds and Liverpool Canal by. The park contains several wildflower areas that form part of the Roots project.

Walk. Run. Bike. Picnic. Play. At the Canal side park, your options for adventure are wide open or you can just relax and take in spectacular waterfront sunsets.

Tree Resting Zone

Creating a biophilic city in a Garden, where inhabitants live amidst a sustainable and biologically diverse urban ecosystem.

SOLAR TREES FOR CAR CHARGING

The working of a solar tree is much like that of a real one—leaf-like solar panels connected through metal branches using sunlight to make energy

The Solar tree panels charge batteries during the day. At dusk, the tree automatically switches on LED lights. It is programmed to regulate the amount of light it produces

For developing a renewable energy-based grid, interested micro, small, and medium enterprises can align their business models

It will touch upon energy harnessing & storage schemes, distributed battery management, power conversion and connectivity, which are the basic building blocks for a modular, scalable, solar powered EV charging station

EXTERNAL MOSQUITO REPELLENTS & MOBILE CHARGERS

During the day it saves Power while children are having fun and playing then the Power works to control the mosquitoes at night

That mesh carries a significantly higher voltage than the outlet used to power it, instantly killing the mosquito as soon as they make contact and complete a circuit with the mesh

A solar phone charger harnesses the power of the sun (a.k.a solar energy) to supply electricity to your devices or charge the battery. The benefit of these portable devices is that they don't require an external electricity source to function, making them great for outdoor enthusiasts or people who may not have access to a power outlet right away (like if you're at a music festival in the middle of the desert or midway through a scenic hike).

BIRD BUS STOP

The Base:

Cement coated with rubber made from recycled tires. This serves as foundation allowing a easy installation while making easier access to buses.

The Structure:

Metallic with interior pipes for water drainage.

Plants:

Being local, the greenroof does not require special maintenance because plants are adapted to the local rainfall frequency and temperature. Autochthonous plants provide food and habitat to Autochthonous birds.

The Roof:

The Recycle reinforced plastic roof supports a 10 cm layer of soil along its entire surface and has a deeper area where you can place larger plants.

NETTED RESTING ZONE

ROBO VACUUM

Robotic vacuum cleaner focuses on keeping your floors clean every day, so you can focus on everything else life throws your way. Daily dust and dirt can make keeping up with cleaning your home feel like a never ending task

Features:

Spot cleaning with Remote control

Anti-falling sensor and non-collision sensor avoids accidental damage to product

Daily schedule auto cleaning time and auto charging

Anti-winding design, won't be troubled by hair

NETED CRICKET COURT

An indoor cricket court (also known as an arena of field) is the playing area used in a game of indoor cricket.

The length of an indoor cricket pitch is the same as a conventional cricket pitch, and has 3 stumps at each end, but there the similarities end. The pitch is marked in line with the stumps at each end, and is 1.83 metres in width at the batting end and 2.47 metres at the bowling end with the stumps in the centre, and the middle stumps are 20 metres apart.

Kids Play Area

**GREEN
TECH**
